● 文章離題

離題，不符合試題的要求：只有第一句提到機車，其他部份則完全和主題無關，因此即使寫的好，分數還是很低。

例文：

Motorcycles are important for transportation in Taiwan, which is improving all the time. There are several reasons why transportation is getting better. First of all, new freeways are being built. These freeways link the major cities and speed up traffic. Secondly, airline service has improved. There are now more flights between cities in Taiwan, providing travelers with a fast way to get from one part of the island to another. Finally, mass transit systems have begun to appear. The new MTR system in Taipei provides a fast and reliable way to get around the city and suburbs. All in all, progress is being made in improving transportation in Taiwan.

標點錯誤：這裡是指嚴重的標點錯誤。

例文：

No one can deny that it's very convenient to own a motorcycle. Having a motorcycle, you can always approach your destination rapidly without spending much time finding a parking space. In the big cities such as Taipei a foreigner may be stunned at the tremendous number of automobiles along the street. The scene is just like a bottle of water filled with hundreds of sardines, a fish struggles to pass another and all the fish eventually form a horrible "traffic jam". Frankly speaking, in such a small crowded city, what kind of vehicle can be more effective and more suitable than a motorcycle. What's even more important a motorcycle is cheap enough for a youth to buy one. As a result, riding a motorcycle has been a fashion overspreading in Taiwan. However the air and noise pollution which motorcycles have brought to us are becoming more and more serious. I think it's time for us to discuss how to prevent the number of motorcycles from "sky rocketing."
